ELECTRICAL INSTALLATION CONDITION REPORT

Requirements For Electrical Installations - BS 7671 IET Wiring Regulations

CMC

Report Reference: 10938379

1 DETAILS OF THE PERSON ORDERING THE REPORT

Client: Holybourne theatre

Address: London Road, Holybourne, Alton

2 REASON FOR PRODUCING THIS REPORT

Reason for producing this report:

5 yearly Safety assessment requested by client.

Date(s) on which inspection and testing was carried out: 14/07/2022

3 DETAILS OF THE INSTALLATION WHICH IS THE SUBJECT OF THIS REPORT

Installation Address: Holybourne theatre, London Road, Holybourne, Alton

Description of premises: Domestic N/A Commercial ✔ Industrial N/A Other: N/A

Estimated age of wiring system: 25 years Evidence of additions/ alterations: Yes if yes, estimated age: 5 years

Installation records available? (Regulation 651.1) No Date of last inspection: 07/03/2017

4 EXTENT AND LIMITATIONS OF INSPECTION AND TESTING

Extent of the electrical installation covered by this report:

50% of the installation in accordance with item 3.8.4 of Guidance Note 3.
100% of the sub main Distribution installation.

Agreed limitations including the reasons (see Regulation 653.2):

No Lifting of floor boards or inspection of loft space.

Agreed with: Site Manager

Operational limitations including the reasons:

None

The inspection and testing detailed in this report and accompanying schedules have been carried out in accordance with BS 7671:2018 (IET Wiring Regulations) as amended to 2018.
It should be noted that cables concealed within trunking and conduits, under floors, in roof spaces, and generally within the fabric of the building or underground, have not been inspected unless specifically agreed between the client and inspector prior to the inspection. An inspection should be made within an accessible roof space housing other electrical equipment.

5 SUMMARY OF THE CONDITION OF THE INSTALLATION

See page 3 for a summary of the general condition of the installation in terms of electrical safety.

Overall assessment of the installation in terms of it's suitability for continued use*: UNSATISFACTORY

* An unsatisfactory assessment indicates that dangerous (Code C1) and/or potentially dangerous (Code C2) conditions have been identified.

6 RECOMMENDATIONS

Where the overall assessment of the suitability of the installation for continued use on page 1 is stated as 'UNSATISFACTORY', I/We recommend that any observations classified as 'Code 1 - Danger Present' or 'Code 2 - Potentially dangerous' are acted upon as a matter of urgency.
Investigation without delay is recommended for observations identified as 'FI - Further Investigation Required'.
Observations classified as 'Code 3 - Improvement recommended' should be given due consideration.

Subject to the necessary remedial action being taken, I/we recommend that the installation is further inspected and tested by: 5 Years

Note: The proposed date for the next inspection should take into consideration the frequency and quality of maintenance that the installation can reasonably be expected to receive during its intended life. The period should be agreed between relevant parties.

7 OBSERVATIONS AND RECOMMENDATIONS FOR ACTIONS TO BE TAKEN

Referring to the attached schedules of inspection and test results, and subject to the limitations specified on page 1 of this report under 'Extent of the Installation and Limitations of Inspection and Testing':

N/A There are no items adversely affecting electrical safety

or

✔ The following observations and recommendations are made

Item No	Observations	Classification Code
1	Inspection Schedule Item 5.15: Presence of RCD six-monthly test notice at or near equipment, where required (514.12.2) is recommended for improvement.	C3
2	Inspection Schedule Item 5.16: Presence of diagrams, charts or schedules at or near equipment, where required (514.9.1) is recommended for improvement.	C3
3	Inspection Schedule Item 5.17: Presence of non-standard (mixed) cable colour warning notice at or near equipment, where required (514.14) is recommended for improvement.	C3
4	Inspection Schedule Item 5.24: Protection against electromagnetic effects where cables enter ferromagnetic enclosures (521.5.1) is recommended for improvement.	C3
5	Inspection Schedule Item 3.1.3: Adequacy of earthing conductor connections (542.3.2) is in a dangerous condition and presents risk of injury. Immediate remedial action is required.	C1
6	Inspection Schedule Item 3.1.6: Adequacy and location of main protective bonding conductor connections (543.3.2; 544.1.2) is recommended for improvement.	C3
7	Inspection Schedule Item 3.1.7: Accessibility of all protective bonding connections (543.3.2) is in a dangerous condition and presents risk of injury. Immediate remedial action is required.	C1
8	Inspection Schedule Item 3.1.8: Provision of earthing/bonding labels at all appropriate locations (514.13) is recommended for improvement.	C3
9	Inspection Schedule Item 4.3: Electrical separation (Section 413; 418.3) is recommended for improvement.	C3
10	Inspection Schedule Item 6.1: Identification of conductors (514.3.1) is recommended for improvement.	C3
15	Inspection Schedule Item 6.8: Examination of cables for signs of unacceptable thermal or mechanical damage/deterioration (421.1; 522.6) is in a potentially dangerous condition. Urgent remedial action is required.	C2
16	Inspection Schedule Item 1.2: Service head is in a potentially dangerous condition. Urgent remedial action is required.	C2

One of the following codes, as appropriate, has been allocated to each of the observations made above to indicate to the person(s) responsible for the installation the degree of urgency for remedial action.

C1 Danger Present
Risk of injury. Immediate remedial action required

C2 Potentially dangerous
Urgent remedial action required

C3 Improvement recommended

FI Further investigation required without delay

Immediate remedial action required for items:	5, 7
Urgent remedial action required for items:	15, 16
Improvement recommended for items:	1, 2, 3, 4, 6, 8, 9, 10
Further investigation required for items:	N/A

7 OBSERVATIONS AND RECOMMENDATIONS FOR ACTIONS TO BE TAKEN (CONTINUED)

Item No	Observations	Classification Code
17	Inspection Schedule Item 7.1: Identification of conductors (514.3.1) is in a potentially dangerous condition. Urgent remedial action is required.	C2
17	Inspection Schedule Item 7.2: Cables correctly supported throughout their run (521.10.202; 522.8.5) is in a potentially dangerous condition. Urgent remedial action is required.	C2
17	Inspection Schedule Item 7.3: Condition of insulation of live parts (416.1) is in a dangerous condition and presents risk of injury. Immediate remedial action is required.	C1
17	Inspection Schedule Item 7.5: Suitability of containment systems for continued use (including flexible conduit) (Section 522) is in a potentially dangerous condition. Urgent remedial action is required.	C2
18	Inspection Schedule Item 7.6: Adequacy of cables for current-carrying capacity with regard for the type and nature of installation (Section 523) is in a dangerous condition and presents risk of injury. Immediate remedial action is required.	C1
18	Inspection Schedule Item 7.8: Presence and adequacy of circuit protective conductors (411.3.1.1; 543.1) is in a potentially dangerous condition. Urgent remedial action is required.	C2
19	Inspection Schedule Item 7.14: Band II cables segregated/separated from Band I cables (528.1) is recommended for improvement.	C3
20	Inspection Schedule Item 8.1.3: Capable of being secured in the OFF position (462.3) is recommended for improvement.	C3
21	Inspection Schedule Item 1.3: Earthing arrangements is in a dangerous condition and presents risk of injury. Immediate remedial action is required.	C1

One of the following codes, as appropriate, has been allocated to each of the observations made above to indicate to the person(s) responsible for the installation the degree of urgency for remedial action:

- C1 Danger Present. Risk of injury. Immediate remedial action required
- C2 Potentially dangerous. Urgent remedial action required
- C3 Improvement recommended
- FI Further investigation required without delay

Immediate remedial action required for items:	17, 18, 21
Urgent remedial action required for items:	17, 17, 17, 18
Improvement recommended for items:	19, 20
Further investigation required for items:	N/A

C3 Improvement recommended

FI Further investigation required without delay

Immediate remedial action required for items:	1
Urgent remedial action required for items:	N/A
Improvement recommended for items:	N/A
Further investigation required for items:	N/A

8 GENERAL CONDITION OF THE INSTALLATION

General condition of the installation (in terms of electrical safety):

This installation has been modified since the last inpsection, there are several items of remeadial work that require attention.

9 DECLARATION

I/We, being the person(s) responsible for the inspection and testing of the electrical installation (as indicated by my/our signatures below), particulars of which are described above, having exercised reasonable skill and care when carrying out the inspection and testing, hereby declare that the information in this report, including the observations and the attached schedules, provides an accurate assessment of the condition of the electrical installation taking into account the stated extent and limitations in section 4 of this report.

ELECTRICAL INSTALLATION CONDITION REPORT
GUIDANCE FOR RECIPIENTS

(to be appended to the Report)

This Report is an important and valuable document which should be retained for future reference.

1. The purpose of this Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section 5). The Report should identify any damage, deterioration, defects and/or conditions which may give rise to danger.
2. The person ordering the Report should have received the 'original' Report and the inspector should have retained a duplicate.
3. The 'original' Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner/occupier with details of the condition of the electrical installation at the time the Report was issued.
4. Where the installation incorporates a residual current device (RCD) there should be a notice at or near the device stating that it should be tested six-monthly. For safety reasons it is important that this instruction is followed.
5. Section 4 (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.
6. Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section 4.
7. For items classified in Section 7 as C1 ('Danger present'), the safety of those using the installation is at risk, and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work immediately.
8. For items classified in Section 7 as C2 ('Potentially dangerous'), the safety of those using the installation may be at risk and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.
9. Where it has been stated in Section 7 that an observation requires further investigation (code FI) the inspection has revealed an apparent deficiency which may result in a code C1 or C2, and could not, due to the extent or limitations of the inspection, be fully identified. Such observations should be investigated without delay. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section 6).
10. For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons, competent in such work . The recommended date by which the next inspection is due is stated in Section 6 of the Report under 'Recommendations' and on a label at or near to the consumer unit/ distribution board.
